

# PRODUCT INFORMATION SHEET

## SCHUTZWACHS

### Features

chemically resistant to acids, alkalis, salts, oils and greases | caring and gentle to materials | dirt and water repellent thanks to beading effect | protects and seals | universally applicable

### Field of application

#### **Vehicles**

rims | body parts and surfaces of all kinds of vehicles - painted, unpainted, chromed

#### **House + Garden**

Components and surfaces made of stainless steel, aluminum or glass | painted, unpainted, chrome-plated surfaces | surfaces in animal sheds | lawn mowers and other machines | tools

#### **Hobby**

Bicycles | Play and sports equipment

### Application

Clean the surface to be treated with the foam cleaner and allow to dry. Shake protective wax upside down before use.

#### **For smaller areas**

For effortless application, we recommend dosing the protective wax onto a dry sponge or microfiber cloth and then polishing the surface with circular movements and a little pressure until no residue of the wax is visible. If necessary, re-polish the surface with a clean cloth.

#### **For larger areas**

Spray the surface evenly at a distance of 20 - 30 cm. Then polish the surface with a dry sponge or microfiber cloth in circular movements and with a little pressure until no wax residue is visible. If necessary, re-polish the surface with a clean cloth.
